

KAREN'S HOME TRENDS: Our homes, just like our wardrobes, need a little sprucing up every now and then. Here are some ways to change things up a bit while adding style to your favorite place:

Geometrics – Tired of chevron? It's been around for a while and it's starting to lose its luster. Try honeycomb or another geometric shape for a different take. It still adds a bit of fun and modern design to any room. Adding shapes can be as simple as a pillow, bed sheets, curtains, mirrors or artwork.

Paint it Black – Looking for a little drama in your home? Try painting the window trim black. It makes your windows "pop" and gives an instant frame to your outside view. It's a real stunner!

Next time, I'll have a couple more decorating tips that'll be sure to please the home designer in you!
